Proposed Solution Template:

S.No	Parameter	Description
1.	Problem Statement (Problem to be solved)	A student needs an easy-to-use digital platform to predict their chances of getting admission to a university of their choice. How might we help a student to predict their chances of getting admission to a university of their choice?
2.	Idea / Solution description	To develop a platform for predicting the Accurate Admission chances of a student based on his/her profile and the previous admission statistics of the chosen universities using Data Science Techniques.
3.	Novelty / Uniqueness	- Utilizing only verified data for students(users) as well as universities to avoid misleading information. - Up-to-Date Information - Most accurate predictions than competitors
4.	Social Impact / Customer Satisfaction	- Guiding the students throughout the whole process to get enrolled in the university/college of their choice. - Quick and Easy to use UI/UX

5.	Business Model (Revenue Model)	Subscription plans - For 1-to-1 support from an Education Expert, etc. - For interacting with College Staff, Alumni, currently enrolled students. - Career Counselling Test & Tools.
6.	Scalability of the Solution	- Providing a recommended list of Colleges/Universities as per student qualifications. - Comparison Tools - Information about Financial Aids & Scholarships. - AI Chatbots
